AstroTurf is a registered trademark used under license from AstroTurf, LLC - IN-AADR1202-E-0409

Specifications

(All weights and measures are approximative)

- Length: 16 m
- Width: 0.91 m
- Net weight: 46 kg
- Gross weight max.: 51.5 kg
- Roll: Roll packed in cardboard octabin or stretch wrapped.

- Product code: 10272739
- Product description: PP,O,ATSP,HP01,91x16m,NW,FS,OCT
- EAN code: 5411773008707
- Standard Colour : Classic Green 01
- Also existing in Palace Red 20 and Slate Grey 41

Product description

AstroTurf® Grand Prix is high quality heavy duty outdoor grass matting, designed for applications where adhesion is required. The grass blades are 20.5mm high, and there are minimum 72,000 blades per square meter. The grass effectively resists abrasion and did not lose any blades after a 45,000 cycle destructive WRONZ test (see technical information). The backing is made of non-woven polyester fabric with a fiberglass scrim for additional mechanical strength. AstroTurf® is stabilized for outdoor use in all weather conditions (-25°C to +45°C). Our product is environmentally-friendly; it is made of 100% recyclable Polyethylene.
